

A world map is displayed in the background, color-coded by life expectancy. North America, Australia, and parts of Europe and Asia are colored in shades of yellow and light green, indicating higher life expectancy. South America, Africa, and parts of Asia are colored in shades of green and dark blue, indicating lower life expectancy. The map is overlaid with a network diagram consisting of grey nodes connected by lines, with some nodes highlighted in blue. The title 'Life Expectancy Report' is written in a large, bold, blue font in the lower-left quadrant.

Life Expectancy Report

Group 30 - Bogensperger, Jaoua, Siegl

Questions and Sources

What is the average human life expectancy in the world?

How does it differ based on different characteristics?

In which countries did the life expectancy improve the most?

What characteristics of countries are predictors for differences in life expectancies?

Global Health Observatory - Data repository

World Bank - Data bank

Data transformation

01	Merging	<ul style="list-style-type: none">• Transforming individual data sets into agreed format• Country name mapping• Combining individual data sets
02	Subset Selection and data cleaning	<ul style="list-style-type: none">• Investigating percentage of missing values• Selection of countries, attributes and time frame• Exploring attribute types and value ranges
03	Imputation	<ul style="list-style-type: none">• KNN - Imputation of missing values• Assigning each (year, country) instance to an income group• Interpolating life expectancy information for line plots

Explanatory Analysis

Life expectancy at birth for countries with high variance

Life expectancy at birth per Income group

Life expectancy at birth per Gender

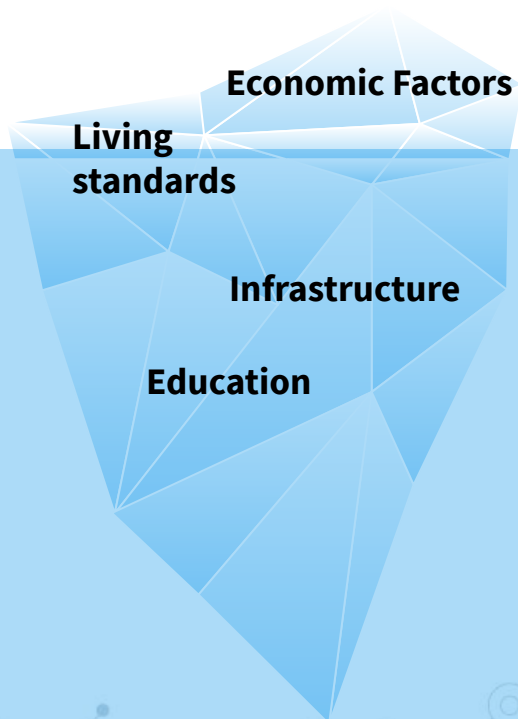

Model building

- ◎ LASSO
 - Tr. MSE 10,59 years
- ◎ RandomForest
 - Tr. MSE: 1,43 year
 - Test MSE: 2 years

Factor Analysis

Sum Up

Data to compare ALL countries is hard to find

Rising life expectancy is a global trend

Men are expected to live 5 years shorter than women

Health features, education and peace can be expressed by economic factors
